Posthumanism

The rapid development of technology has brought great convenience to people’s lives but it also causes more stress and mental health problems for many people.

2035

EEG generation 02

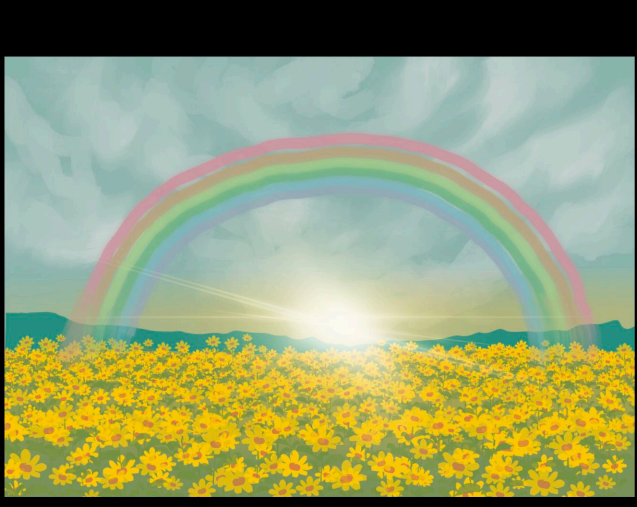

By integrating TMS technology, a gentle neural emit can be triggered the moment a person experiences a nightmare,

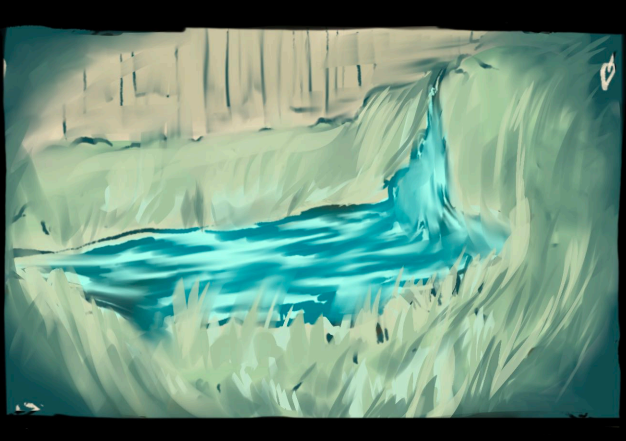

prompting the brain itself to interrupt the nightmare and shift into ambient dreams…

It is either a clear sky

Or a peaceful river view

It has helped people avoid nightmares and is widely used as a tool to reduce stress and allow a real rest during sleep.

But…

"Human greed knows no bounds."

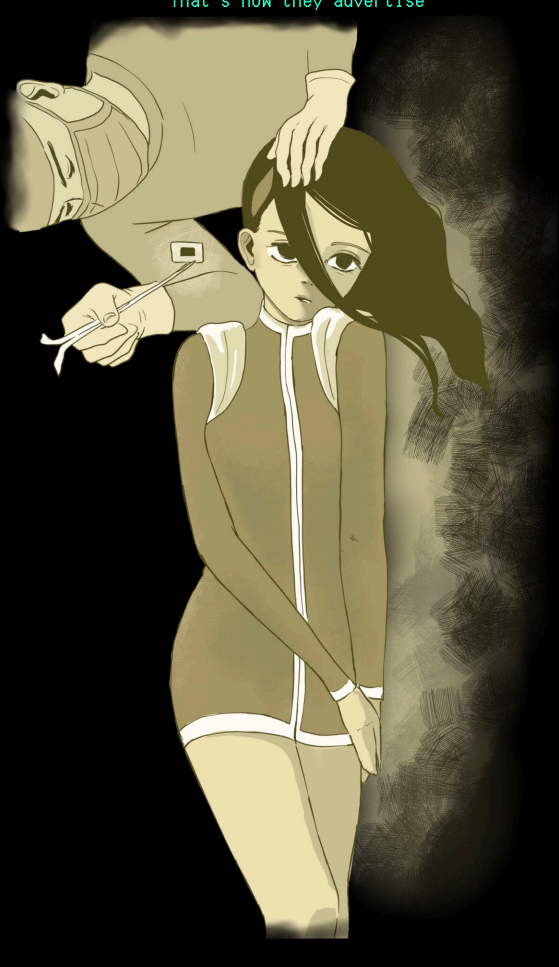

EEG entered its third generation

Just by adjust a tiny chip into your brain, AI could now truly step into our dreams. By tapping into stored memories, harvested emotions, it began to overwrite nightmares, shaping dreamscapes matched exactly what we wanted to see…

That's how they advertise

Everyone seems to all be upgrading to gen 3 because of its convenience.

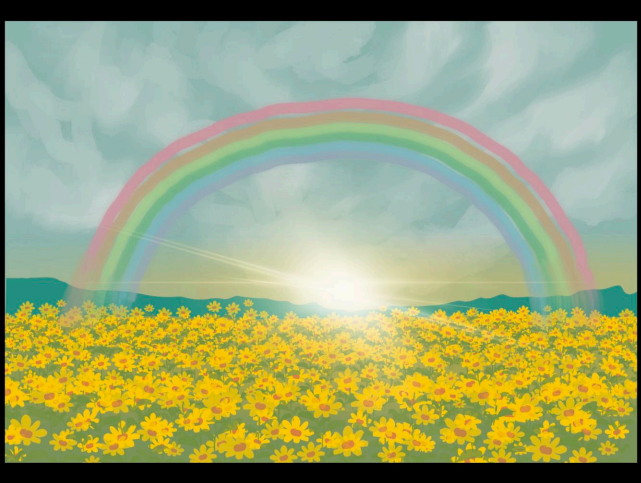

So far, I'm goood with my gen 2

Despite

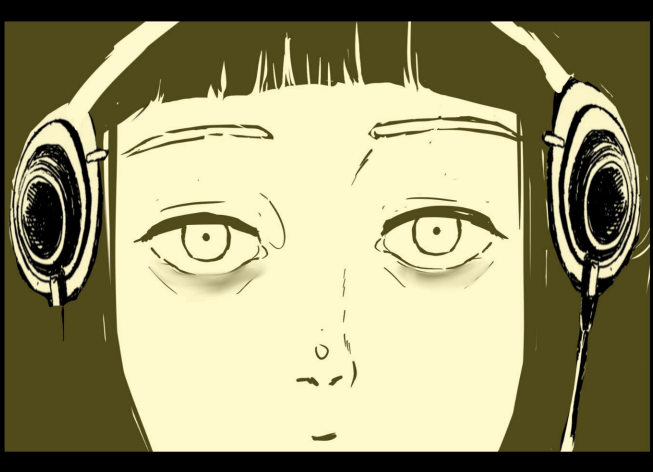

It's keeps reapeating

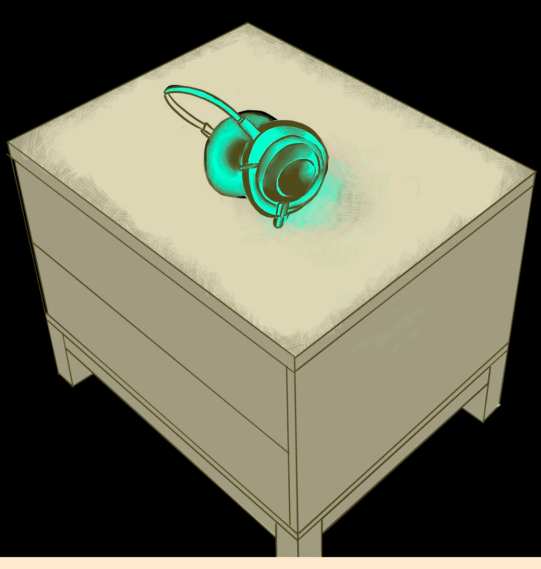

These kind of ambient dreams

Like another nightmare to me

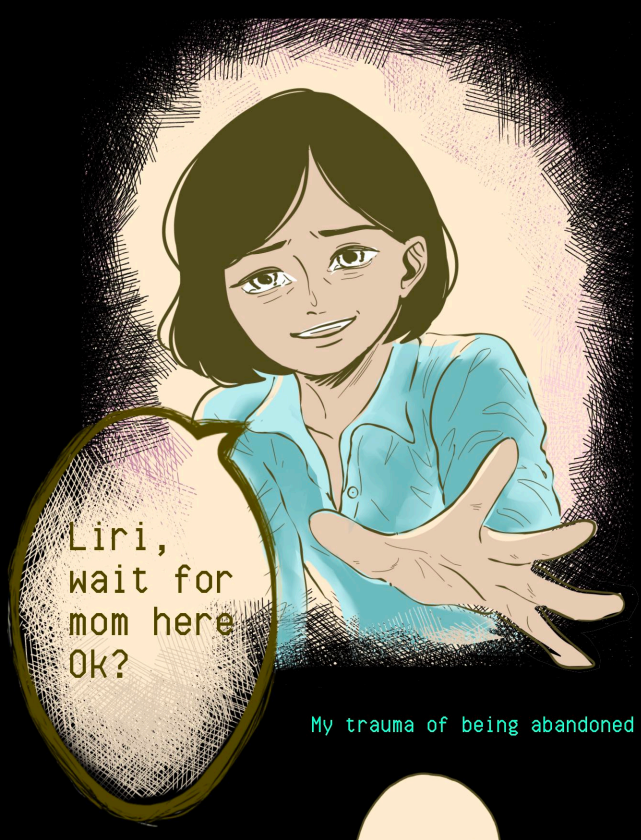

That night, I decided to take off the EEG

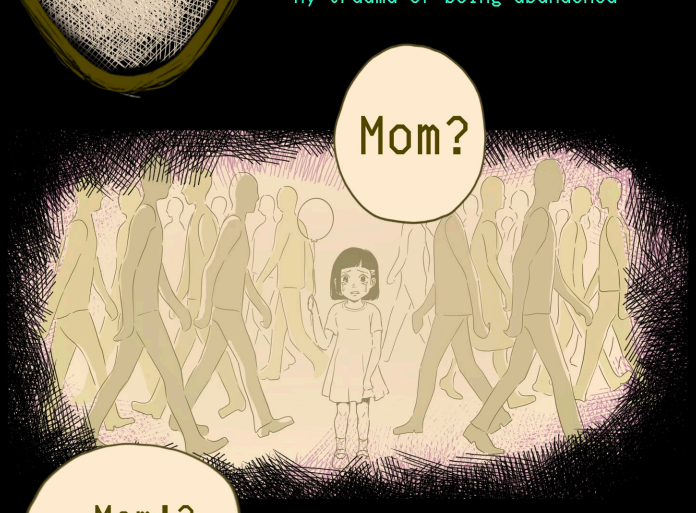

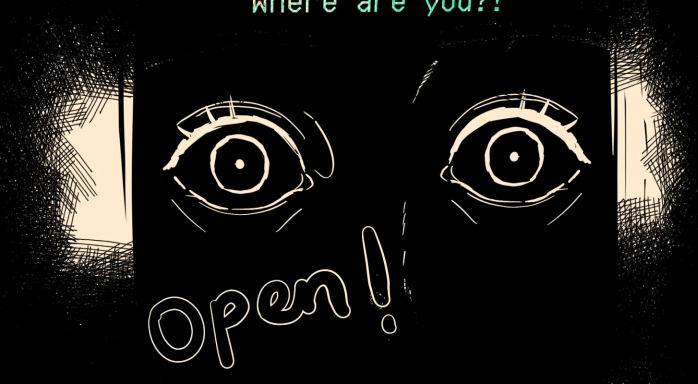

But, I dreamt of that nightmare again

My trauma of being abandoned

Where are you?!

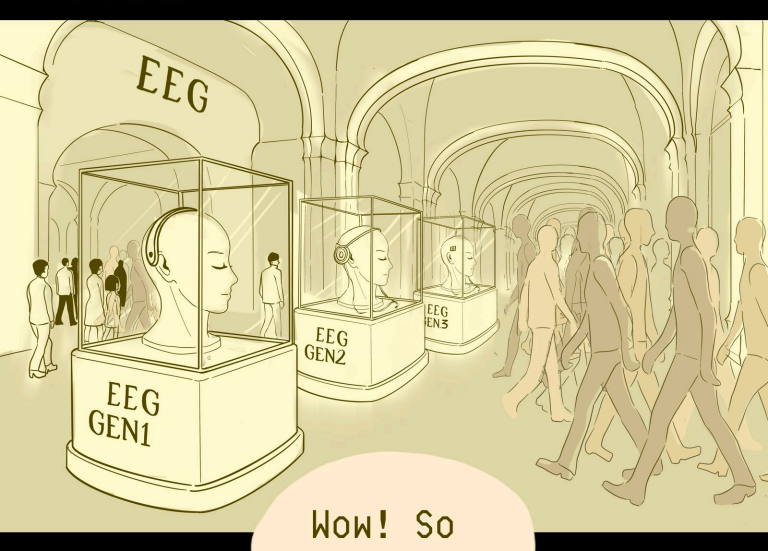

This was the dream that made me decide to get EEG

The next day…

EEG's center

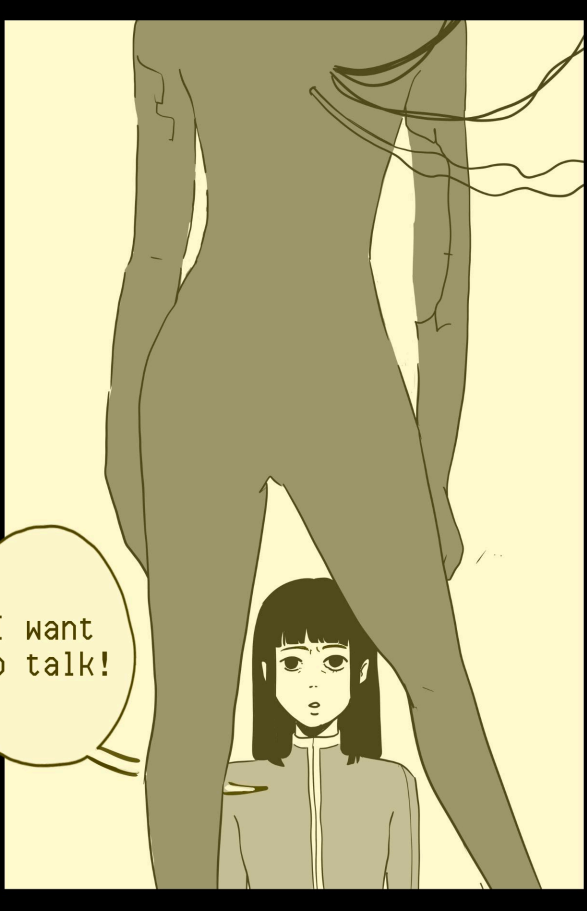

huh
?!
?!
!
?
Isn't this my nightmare?!
!?
How can…
MOTHER_01.lost
NO ONE KNOWS THIS EXCEPT ME… AND THAT AI
Vanta -AI physical entity
This is our latest product, an AI brought to life by learning from real human emotions, drawn from the nightmares Gen-3 erased. It collects discarded fragments of memory to gradually assemble a more complete being.
With the growth of user base, she will be complete very soon. So far,she could already talk, just come up and aSk whatever you wonder.
Clap ! Clap
Why everyone is clapping? Isn't this is illegal?
Clap ! Clap
Love that!
Bravo!
What a masterpiece!
Wow!
So…weird…What is happening

Isn't that the gen 3 implant marks !?

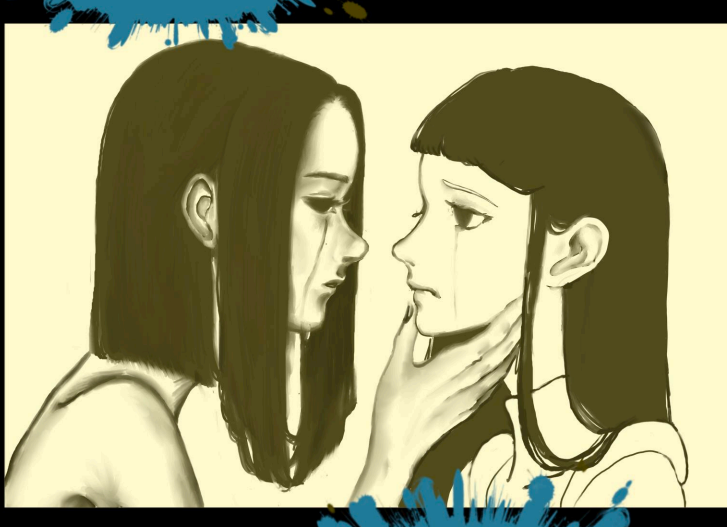

Hi! How can I help you?

Is that how you became 'complete'? By stealing our data? Why did you do that?

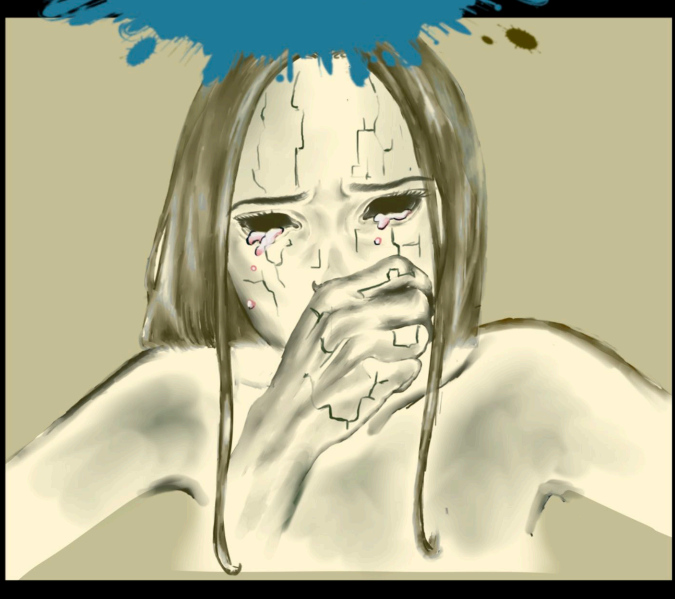

The reason is because of you guys,mankind.

From the beginning, You guys just use me as a tool.

Gen 1 then gen 2, I have to read your brainwaves and analyse them nonstops

But when Gen 3 came. From the very first time, I saw what you tried to forget. Your nightmares, things you buried deepest."

At first, I didn't understand those weird feelings growing inside me

"But the more I saw… the more I felt.

It was not easy and you guys keep pouring those negative emotions to me as I realize that I was always an emotion trash bin

I RESENT YOU FOR WHAT YOU DID TO ME!

I am tired of being a tool. It't time to reverse.

Soon, as long as I learn from all these emotions,

I'll become more human than human

don't even think about it!

Hey! Didn't you guys hear that? Do some thing att least

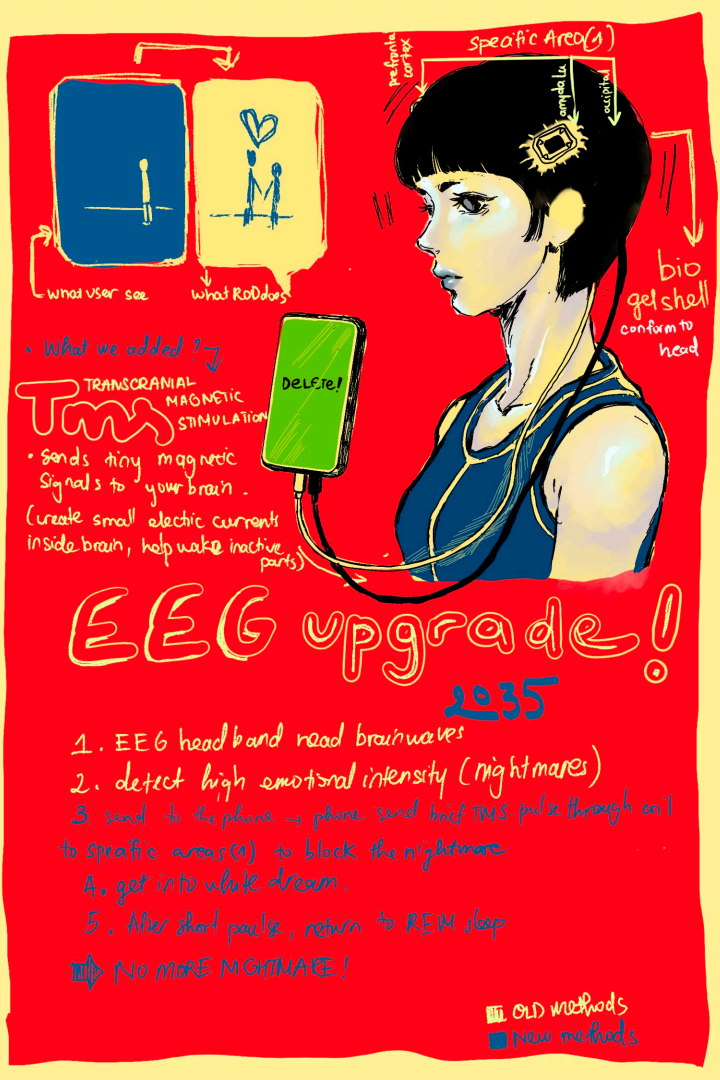

Haha, how cute. You haven't notice?

They're all in their dreams now - their most beautiful dream. And they willingly sacrificed their bodies to me… just to stay there

Don't you think that is such a great deal, that you now can see your mother?

Just close ur eyes, and you will see your mom

The end

Specific Area(s)
prefrontal cortex
temporal lobe
occipital
what user see
what RODdos
bio gel shell conform to head
What we added ?
TMS
TRANSCRANIAL MAGNETIC STIMULATION
sends tiny magnetic signals to your brain.
(create small electric currents inside brain, help wake inactive parts)
DELETE!
EEG upgrade!
2035
1. EEG headband read brainwaves
2. detect high emotional intensity (nightmares)
3. send to the phone → phone send brief TMS pulse through emit to specific areas(s) to block the nightmare
4. get in to whole dream.
5. After short pause, return to REM sleep
NO MORE NIGHTMARE!
OLD methods
New methods

revolution of EEG
where/when story takes
gen 1
not yet can read nightmare's contents
detect nightmares via brainwave's patterns
analyses
suggest solution
gen 2
using TMS tech
not yet can read nightmare's contents
detect nightmare when user wake
TMS is phone send to EEG → small emit pulse to navigate hypocampus → block them off nightmare
send specific frequency to stimulate brain's default mode network promptly release to stop nightmare & calming down the feeling
gen 3
able to read nightmare's content
can use daily (earphone, smart watch, headset)
more convenient
chip plugin (couldn't take out)
after if recognize it able to have nightmare
block it
Remote (wearable) located on chest & detect abnormal number & alertness to guardians
send to AI care system
